Approval of the Wastewater Pretreatment System at Longview Fibre Company

Dear Mr. Craig:

King County has reviewed and approved the design of the wastewater pretreatment system at the Longview Fibre Facility. This approval authorizes you to construct the pretreatment system as proposed in the engineering drawings received by King County on January 29, 1998.

This approval does not in any way guarantee effective operation of your pretreatment facilities. This approval does not relieve Longview Fibre Company, or any subsequent operator, of the responsibility to enlarge, modify or replace the pretreatment facilities to meet King County's discharge requirements. All modifications to your pretreatment system that have the potential of affecting the discharge must be reviewed and approved by King County prior to construction or initiation.

Sincerely,

Rick Renaud, P.E.
Water Quality Engineer
Industrial Waste Program
